

FODS TRACKOUT CONTROL

FODS MAT

- Mat size is 12' wide by 7' long and pyramids are 3" tall.
- It will take 10 mats to make a system for a standard 12' x 70' entrance used on most construction sites. Various jurisdictions require different lengths so this may be less or more depending where they will be used.
- Mats weigh approx. 430lbs.
- Mats can be anchored to the ground and anchored together.
- Mats are made out of HMWPE (High Molecular Weight Polyethylene).
- Mats are FODS yellow in color.

STABILIZED CONSTRUCTION ENTRANCE (SCE)

12' wide by 70' long of appropriate aggregate. Location where SCE is to be located needs to be excavated 6" down in depth, a geotextile erosion control fabric placed down, with aggregate placed on top.

Individual jurisdictions have specifications that they require which can increase or decrease depth, width, length, size of aggregate, and similar. After SCE removal, topsoil must be added back to disturbed area, graded, and re-seeded.

FODS IS YOUR ENVIRONMENTAL SOLUTION

Ideal for construction, airports, government, military, mining, agriculture, forestry, renewable energy, oil and gas, telecommunications, national parks, storm water, roads and bridges.

	FODS	ROCKS
Becomes Clogged	No	Yes
100% Solid and uniform construction	Yes	No
Recyclable	Yes	No
Easily Cleaned	Yes	No
Reusable/transportable	Yes	No
Absorbs chemicals and oils	No	Yes
Protects ground underneath	Yes	No
Supports 80 tons	Yes	Yes
Easily seen from streets	Yes	No
Made in USA	Yes	Yes
Amount of uses	100's	1
Spans over uneven ground	Yes	Yes
Disturbs ground when installed	No	Yes
Shakes vehicles when crossing over	Yes	No

FODS MATS OFFER SUPERIOR BENEFITS:

- Creates an instant construction entrance over virtually any type of surface including asphalt, concrete, turf, marshy area, sand, mud, even ground, uneven ground, and similar
- Will not get clogged, be an eyesore, become embedded in soft ground
- Protects ground when placed on top of surface unlike conventional SCE's (Stabilized Construction Entrance)
- Easily transported from site to site in minutes
- Creates an easily recognizable entrance for vehicles to see day or night

- Mats will not warp, even when installed over uneven terrain
- Superior alternative to rocks, shaker, steel plates
- Supports weights up to 80 tons
- Chemically resistant to acids, oils, break fluid, etc.
- Easily cleaned and put back in service within minutes
- Made in the USA creating American manufacturing jobs
- Easily stored when not being used
- 3 year warranty
- 15 times more abrasion resistant than steel
- Years of use
- 100% recyclable

FODS mats are 100% recyclable, made in the USA, and can be reused for many years. Once cleaned off they do not transport contaminants to other sites. Mountainsides and hillsides are saved from being blasted from rock. FODS mats, at end of use, will not end up in landfills like rocks and similar methods. The ground is undisturbed while mats are being used, keeping soils in place from erosion. Each entrance, that is installed with FODS, will save 3 dump trucks worth of rock on initial install.

Ideal for construction, airports, government, military, oil and gas, roads and bridges, renewable energy, telecommunications, national parks, storm water, pipeline, utilities, mining, agriculture, waste management, and more.
